Public Works Completes Paving at Cedarview and West Tapps

Labor Day week saw several streets in Bonney Lake receive a new lease on life. Three inches of new asphalt was placed on 208th Ave and 97th Street in the Cedar View sub-division on Tuesday, 4 September, and on West Tapps Hwy from Church Lake Drive to Church Lake Road on Thursday, 6 September.

The Cedar View project culminated several months of work that saw new sidewalks, water lines, dry sewer lines, and stormwater lines installed. New secure mail boxes will also be installed on these two streets. This sidewalk project was given a high priority in order to connect Cedar View Park to the SR410 sidewalk, making access to the park much safer for pedestrians. As a result of the extensive trench work done to install new utility pipes on these two streets, both streets were rebuilt with a 3-inch pavement surface. This contract was awarded to Jennings Northwest LLC in the amount of \$767,037. Work was started on May 30th and is going to be completed ahead of schedule by the

end of September. The City Project Manager who inspected the construction work was King Cooper.

The West Tapps Hwy overlay project was given priority due to the frequent need for City Public Works staff to make repairs on the road. In many places, there was less than an inch of asphalt on top of the ground causing frequent pot holes and failure at the edge of the pavement. This overlay also extended the overlay applied earlier in the year when the new sidewalk and water line were installed through Allan Yorke Park on West Tapps Hwy. This contract was awarded to Lakeridge Paving Company in the amount of \$92,996. King Cooper was also the Project Manager on this contract. Assistant Engineer Andrew Fonda designed the West Tapps Hwy overlay contract in record time.

The utility portion of these two projects was funded with Water and Sewer System Development Charge (SDC) revenue and street repairs were funded with gas tax and Real Estate Excise Tax (REET) revenue...Your Dollars At Work. ☐
